

New!

Introducing AHT's SuperSpan Roll Screen

- No more friction problems caused by the old keder design of other screens.
- AHT's exclusive zipper design offers effortless operation in manual and motorized options up to a 24' span @ 60 PSF!
- Thermo-Welded and Stitched with PolyPro 138 for maximum pressure design, tested to 210 PSF!
- Tested to Miami Dade TAS 201, 202, and 203; and to ASTM E-1886, E-1996 and E-330 for impact and loads.
- Florida Building Code 2010 compliant.
- Standard colors are Black webbing on Black Screen or Black/ Brown Screen and White webbing on White Screen or White/ Tan Screen.
- 10 year limited warranty on fabric (screen).
- AMERICAN made to ISO 9001 certification.

Other features & benefits include:

- AHT Screen materials have UV Inhibitors impregnated into the resin.
- Less than 10% Porosity to limit the Air and Water intrusion.
- AHT's SuperSpan End Retention Roll Screen design allows deployment in nominal winds.
- Quick and easy deployment motorized or manually operated.
- 10 oz. per Sq.Yd.
